**What are your legal obligations to me when providing recommendations? How else does your firm make money and what conflicts of interest do you have?**

Eddid Securities USA does NOT provide recommendations. Eddid Securities USA predominantly makes its money from: underwriting, commissions from your self-directed trading; interest on overnight cash balances held in your account; and interest charged to your account when the clearing firm lends you funds for margin trading. The way we make money may conflict with your interests. You should understand and ask us about these conflicts because they can affect the services we provide you. Here are some examples to help you understand what this means.

- We may receive interest on uninvested cash deposited in your accounts, so we benefit from you holding cash in your account.
- We earn commissions on certain trades, so we benefit when you actively trade your portfolio.
- We earn interest on the stocks you purchase on margin, so we benefit from you maintaining a debit balance.
- From time to time, we act as an underwriting participant in registered public offerings. If you choose to purchase shares in such offerings, we will profit because we will acquire such shares from the issuer or the underwriters at a discounted price.

Eddid Securities USA mitigates its conflicts of interest by applying controls and supervising processes and employees. We do not believe that any of our potential conflicts of interest, including those listed above, create a material conflict of interest with you or any of our customers.
